DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the fan tray must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. Fig. 4A, 4B, 4C must have at least one reference number.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: typographical errors on Page 8, line 17 (reference number 15 is incorrect) and on Page 10, line 18 (reference number 157 is incorrect).

Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 3, 5-10, 20-22 rejected under 35 U.S.C. 102(b) as being anticipated by Lee et al.

Lee discloses an electronics assembly, comprising: a chassis defining an internal cavity for receiving a plurality of electronic cards 40, 79, 110, 150; a divider 85, 134, 146, 166 within the chassis, the divider being parallel to the electronic cards and defining first and second flow channels; a first air mover 70, 72 configured to cause air to flow through the first flow channel; and a second air mover 92, 94 configured to cause air flowing in the first flow channel to flow through the second flow channel; the first and second air movers are fans or blowers; the first and second air movers are in a fan tray; the first air mover 70 is in a fan tray with one or more additional air movers 72; the second air mover 92 is in a fan tray with one or more additional air movers 94; the air flowing in the first channel flows in direction opposite the air flowing in the second flow channel; an

intake opening 74 for air to flow through to the first flow channel and an exhaust opening 102 for air to flow through from the second flow channel. The method steps of claims 21 and 22 are necessitated by the device structure as disclosed by Lee et al.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 2, 4, 11, 12-19 rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al. in view of Katooka et al.

Lee discloses the claimed invention except the circuit board as a divider and the flow guide. Katooka discloses the electronic assembly having circuit card as the airflow divider 2, 10 and the flow guide 19 to assist airflow from the first channel to the second channel. It whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to use a circuit board as a divider as disclosed by Katooka et al. in the structure disclosed by Lee et al. as to increase functionality of the circuit card and improve air flow from the first to the second channel.
